Hayling Island, Hampshire | michael.stylianou7@gmail.com | 07922 112823 | linkedin.com/in/michael-stylianou-185055302

Professional Profile

Analytical and detail-oriented Mathematics and Economics undergraduate with practical experience in audit, accounts, procurement, and financial analysis. Demonstrates strong Excel, Python, and accounting software skills, complemented by problem-solving abilities and leadership experience. Curious, thoughtful, and innovative, with a strong interest in AI and technology-driven solutions. Enjoys solving complex problems, recognising patterns, and applying insights effectively. Thrives in collaborative team environments, communicates ideas clearly, and adapts flexibly to new challenges. Seeking to apply financial knowledge, analytical expertise, and innovative thinking to a data-driven role

Education

University of Liverpool – Liverpool, UK | BSc Mathematics and Economics | 2023 – Present

Portsmouth Grammar School – Portsmouth, UK | A Levels: Mathematics (A), Physics (C), Biology (C) | 2023

GCSEs: 10 including Mathematics & English | 2021

Awards & Certifications

ChatGPT & Generative AI: Prompt Engineering for Business | Jul 2025

IBM Python Project for Data Science | Jul 2025

HP Life Cash Flow Online Course | Jul 2025

Tesco Retail Media Certification | May 2025

JPMorgan Chase Investment Banking Job Simulation | 2024

Key Skills

Technical: Excel, Python, Financial Statements, Invoicing, Payroll, Data Analysis, RStudio, Claude Code, MATLAB, Data analysis, Regression

Soft Skills: Leadership, Communication, Problem Solving, Adaptability, Teamwork

Projects

PaperAlpha – Stock & Crypto Trading Simulator

- Built and deployed a full stack trading simulation platform where users trade stocks, crypto and commodities with \$100,000 virtual cash at live market prices using Vercel. Portfolio tracking, real time profit and loss, trade history and competitive leaderboard included.
- Engineered a trading engine handling order executing, weighted average cost basis accounting and realised and unrealised profit and loss. Backed by a database and a user authentication using Clerk.

FX Options Pricing and Risk Dashboard 2026

- Built an interactive options pricing tool implementing the Black-Scholes model and Monte Carlo simulation with volatility solving and live market data pulled using yfinance.
- Developed a delta hedging backtester to evaluate the performance and visualise profit and loss for historical price paths.

Game Theory Simulator 2026

- Built a tool to compute Nash equilibria and the best responses. This included an animated iterated elimination of strictly dominated strategies for two player games of perfect information.
- Included classic games such as the Prisoners Dilemma and explanations for user designed payoff matrices.

Regression Analysis Project 2025

- Conducted a multiple linear regression study covering model specification, diagnostic testing and interpretation of statistical significance in a group during a Linear Statistical Models module in university.
